A leading company based in KSA_Amman is seeking to recruit Information Security Engineer

Role Description:

- Build, configure, deploy, troubleshoot and support security systems as per established policies, standards and procedures.
- Perform periodic policy compliance reviews, risk assessments, and control testing.
- Assist in responses to external audits, penetration tests and vulnerability assessments.
- Monitor security systems for anomalies and respond to potential security events.
- Oversee security patch process and validate compliance.
- Assist in the investigation of security incidents as required, and recommend corrective actions and controls.
- Research emerging technologies in support of security enhancement and development efforts.
- Participate in on-call system administration support including but not limited to weekends, holidays and emergencies.
- Complete all responsibilities as outlined on annual performance plan.
- Support all customers in the GCC for any open case
-
- Implementing projects from Kick-off until the sign off
- Travel to GCC as planned by the scheduled projects

Qualifications:

- BS degree in Computer Science/MIS or technically-related field with a minimum of 4 years relevant experience.
- Hands-on experience installing and administering a variety of security systems including firewalls, intrusion detection systems, and security information and event management (SIEM) systems.
- Strong knowledge of information security principles, such as defense in depth, access control, cryptography, and secure communications.
- Knowledge of compliance and regulatory program requirements, such as HIPAA, ISO 27000, FIPS, and PCI DSS.
- Experience using security tools such as log analyzers, network tracers, and vulnerability scanners.
- Demonstrated project management skills and ability to track and report progress against established milestones.
- Excellent written communication skills, demonstrating the ability to write with purpose, clarity, and brevity.
- Experience working with Government and Banking environments a plus.
